

DB Lab-03

Muhammad Aun Anis, 24P-3017

Task 1:

```
1 SELECT name, LENGTH(name) as name_length FROM employees
2 ORDER BY LENGTH(name) DESC LIMIT 1;
```

Task 2:

```
1 select name, left(name,3) as first3 from employees
```

Task 3:

```
1 SELECT name, joining_date FROM employees WHERE YEAR(joining_date) < 2019;
```

Task 4:

```
SELECT name FROM employees where name like '%a%';
```

Task 5:

```
select salary, concat(salary,'pkr') as formatsalary from employees;
```

Task 6:

```
1 SELECT department, SUM(salary) as total_dept_salary FROM employees GROUP BY
department ORDER BY total_dept_salary DESC LIMIT 1;
```

Task 7:

```
1 SELECT department, COUNT(*) as rich_employee_count FROM employees WHERE salary > 50000 GROUP BY department;
```

Task 8:

```
1 SELECT name, DATE_FORMAT(joining_date, '%M %d, %Y') as dateformat FROM employees;
```

Task 9:

```
1 SELECT name, TIMESTAMPDIFF(YEAR, joining_date, CURDATE()) as years_worked FROM employees;
```

Task 10:

```
1 SELECT name, salary, salary % 5000 as remainder FROM employees;
```
